8. Ideal answer to the specific question:

"Time management is a crucial skill for achieving goals and reducing stress. To explain it to someone who struggles with it, I would start by defining what time management means. It's about prioritizing tasks, setting realistic goals, and using tools like calendars and to-do lists to stay organized. One technique that helps me manage my time effectively is the Pomodoro Technique. It involves working in focused 25-minute increments, followed by a five-minute break.

This technique helps me stay focused and avoid burnout. By implementing this technique, I've been able to increase my productivity and reduce my stress levels."
